THE SOCIAL CLASS LENS

HOW AMARILLO COLLEGE IN TEXAS CREATED A CULTURE OF CARE

WITH **RUSSELL LOWERY-HART** PRESIDENT, AMARILLO COLLEGE

Education and poverty are tied together in a nightmare of policy failures, bureaucratic culture, stereotypes of those trapped by poverty, and professional inaction. Amarillo College rebuilt itself to intentionally and structurally address these issues. The results have been transformative for their students. The Amarillo community's future was linked to Amarillo College's ability to love their students to success. Education attainment was the imperative.

Join us as Russell Lowery-Hart teaches us how Amarillo College works to defeat the crisis of income inequality and economic destruction through education, the magical results and what higher education institutions in colonized countries such as Canada can learn from Amarillo College's intentional structures of support and a culture centred on students rather than self.
